Minimum Initial Investment	\$100,000
Minimum Additional Investment	\$1,000
Sales Load	None
Dividends	Declared and paid annually

INVESTMENT OBJECTIVE & STRATEGY

The Fund seeks long-term capital growth and income through an actively managed portfolio of equity and fixed income securities. The Fund's investment process focuses on asset allocation, segment composition, and security selection. The Adviser seeks to construct a diversified portfolio of reasonably valued equity and fixed income securities of high quality companies and issuers that meet the Fund's environmental, social and governance ("ESG") guidelines.

Asset Allocation

Asset allocation can be the foremost determinant of total portfolio return in most market environments. Moreover, tactical shifts among asset classes can enhance returns and reduce risk over time. Using quantitative and qualitative inputs to forecast asset class returns over a range of US and global economic scenarios, the Adviser sets policy to produce a prudent risk-return portfolio.

Segment Composition

Within both the equity and fixed income segments, the Adviser makes judgments about portfolio composition intended to both enhance return and manage risk. These judgments include considerations such as sector allocation and portfolio duration.

Security Selection

Equity—The Adviser seeks to identify and invest in stocks of higher quality companies at reasonable prices. Higher quality companies are those judged to have sustainable business models, financial stability, prudent capital management, and financial statements that indicate past economic success. The Fund's equity investments are diversified across economic sectors.

Fixed Income—Fixed income holdings are generally those issued by either the US government and its agencies, or investment-grade securities of higher quality US corporations. The Adviser seeks to add value through duration management, yield curve strategies, sector rotation, and individual security selection.

Environmental, Social, and Governance Guidelines

The Adviser evaluates financially material ESG risks and opportunities as part of the investment decision-making process, considering a range of impacts they may have on a company's future revenues, expenses, assets, liabilities, and overall risk. In addition, the Adviser utilizes active ownership strategies to encourage sustainable business policies and practices (e.g., effective climate risk management) and greater ESG transparency (e.g., increased disclosure of salient ESG risks and opportunities). Active ownership strategies include communicating directly with company management teams or boards; filing proposals for vote at company annual general meetings; voting on ballot items in company proxy statements; and engaging public policymakers.

Performance data for three years and longer is annualized. Performance represents Fund shares indicated at net asset value (NAV). The index returns reflect neither the deduction of fees and expenses associated with a mutual fund nor the impact of taxes. Returns quoted are past performance and do not guarantee future results; current performance may be lower or higher. Investment returns and principal value will vary; there may be a gain or loss when shares are sold. For performance of the fund compared to a broad-based index visit <https://www.bostontrustwalden.com/investment-services/mutual-funds/> and review the most recently updated prospectus, annual/semi-annual report, or call 1-800-282-8782 ext. 7050.

FUND RISKS

Equity securities (stocks) are generally more volatile and carry more risk than fixed income securities (bonds) and money market investments. The net asset value per share of this Fund will fluctuate as the value of the securities in the portfolio changes. Common stocks, and funds investing in common stocks, generally provide greater returns over long time periods than fixed income securities. Compared to stocks, bonds generally offer a relatively stable level of income. However, like stocks, bonds will fluctuate, thereby incurring the likelihood of principal gain or loss. The Fund is comprised primarily of equity and fixed income securities and is subject to market risk. Stocks may decline due to general market and economic conditions or due to company specific circumstances. The Adviser's integration of ESG risks and opportunities and/or active ownership activities may cause the Fund to perform differently from a fund that uses a different methodology. ESG integration may cause the Fund to forego investment opportunities that may otherwise be advantageous. The Fund's ESG screening criteria may influence the Fund's exposure to certain companies, sectors, and/or industries, which may adversely affect the Fund's performance depending on how such companies, sectors, and/or industries are performing relative to the market. In addition, the Fund may gain indirect exposure to businesses or activities inconsistent with the Fund's ESG-related criteria in a variety of ways, including one company's investments, joint ventures, etc.

ADDITIONAL DISCLOSURES

Weights are subject to change. Please visit www.bostontrustwalden.com for a complete fund portfolio holdings list. ¹ The S&P 500 is representative of the investible universe of US large capitalization companies. The Bloomberg Capital US Government/Credit Bond Index measures the performance of US Dollar denominated US Treasuries, government-related and investment grade US corporate securities that have a remaining maturity of greater than one year. The Bloomberg US Treasury Bellwether Indices are a series of benchmarks tracking the performance and attributes of eight on-the-run US Treasuries that reflect the most recently issued 3m, 6m, 2y, 3y, 5y, 10y and 30y securities. ² Reflects the expense ratio as reported in the prospectus dated May 1, 2024. The Fund has no sales charge and the gross expense ratio is 0.96% and the net expense ratio is 0.96%, due to expense reimbursement/waiver. The Fund's Advisor has contractually agreed to limit fees and waive certain expenses through May 1, 2025. ³ Definitions: Sales and ROIC (Return on Invested Capital) Variability measure fluctuations in the respective metrics of the Fund or benchmark companies during a given period. Price/Earnings Ratio measures a company's current share price compared to its per-share earnings. Free Cash Flow Yield excludes the financials and utilities sectors.

Please read the statutory prospectus or summary prospectus carefully before investing. An investor should consider the Fund's investment objectives, risks, and charges and expenses carefully before investing or sending money. This and other important information about the investment management company can be found in the Fund's prospectus or summary prospectus. To obtain a statutory prospectus or summary prospectus, please call 1-800-282-8782.
